The screenshot shows the IDLE Shell 3.11.9 window. The title bar is orange and contains the text "IDLE Shell 3.11.9" and standard window control buttons (minimize, maximize, close). The menu bar includes "File", "Edit", "Shell", "Debug", "Options", "Window", and "Help". The main text area displays the output of a Python script. It starts with the Python version and system information: "Python 3.11.9 (tags/v3.11.9:de54cf5, Apr 2 2024, 10:12:12) [MSC v.1938 64 bit (AMD64)] on win32". This is followed by a prompt to type "help", "copyright", "credits" or "license()" for more information. Then, the prompt ">>>" is shown, followed by a restart message: "==== RESTART: C:/Users/hasin/OneDrive/Desktop/cv/26 os.py =====". Finally, the output "Hello File Management" is displayed in blue text, followed by another ">>>" prompt.
